Vehicles Illegally Parked On Verges

Considerable problems of unsightly verges are caused locally by inconsiderate drivers parking illegally.

Welwyn Hatfield Borough Council has a byelaw to minimise grass verge damage. The byelaw is effective when a council officer or warden witnesses someone driving onto the verge and parking. Unfortunately it does not cover the officer or warden observing driving over pavements, or cars parked on the grass without a driver present. Residents however may report vehicle(s) parking on verges within the Borough.

Illegal Parking

The following are required - the registration number, exact location and a photograph of the vehicle on the verge showing the registration number in order to be able to search for the registered keeper details via the DVLA.

If residents are taking photos of other people's cars, please ensure you take care and do not put yourself at any risk. Details should be submitted to the Contact Centre.

Verges Churned Up

The majority of grass verges adjacent to roads are within the public highway and are therefore the responsibility of Hertfordshire County Council, the highways authority.

Please report damage to grass verges or request preventative measures (for example posts or post and rail fencing) to Hertfordshire County Council's highways department who are responsible for verge maintenance using link hertsdirect.org/faultreporting

Alternatively the **FixMyStreet.com** website gives an easy way to report all your faults.
